Matt Stanislao, LMSW

01/01/2019

Bergen County Mental Health Board,

Attached is my resume to sit as a member with the Bergen County Mental Health Board. As you will read, my career and clinical background brings together the law enforcement and mental health professions.

Indeed, today's police must create the optics of social-based work, especially during psychiatric emergencies. This is a challenge, but it is essential to equip police with a comprehensive view of human behavior and systems. Inversely, the same holds true for mental health clinicians when reviewing an emergency through a law enforcement lens.

My academic credentials and licensure provide deeper insights and nuance within our field. Please keep this in consideration in your selection. If there are any further details you need, I would be happy to provide them.

Sincerely,

Matt Stanislao, LMSW
